Figure 1 Sensitivity Temperature Dependence

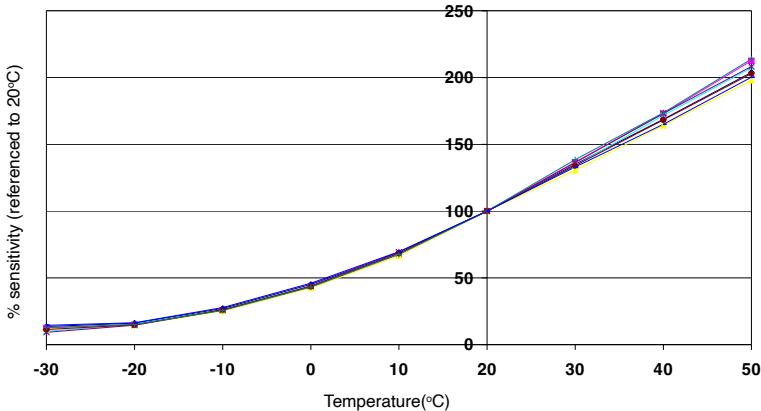

Figure 1 shows temperature dependence of sensitivity to 400ppm hydrogen.

Temperature correction of sensitivity using software is necessary for accurate measurements.

Figure 2 Zero Temperature Dependence

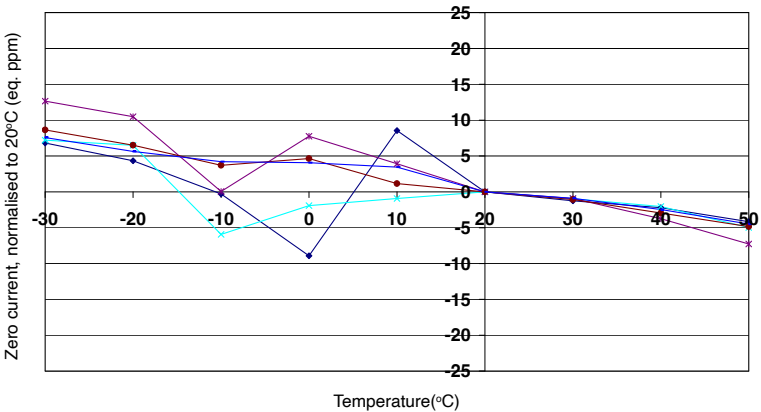

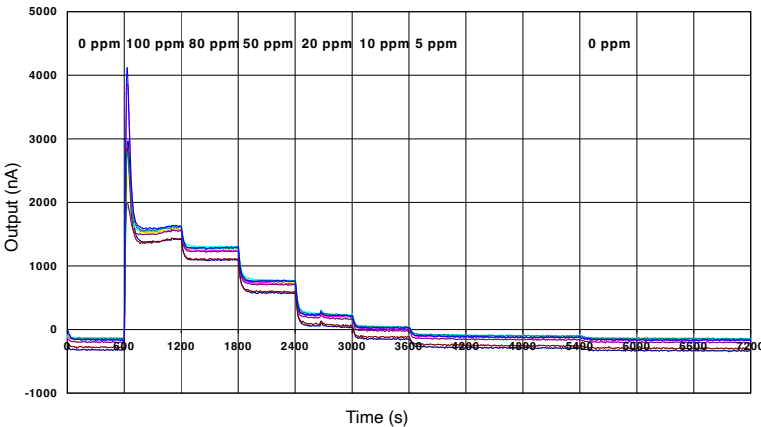

Figure 2 shows the variation of zero current with temperature, referenced to 20°C.

Figure 3 Linearity to 1000ppm

With good sensor response as low as 5ppm hydrogen, this sensor can be used for leak detection and process control.
