Figure 1 Sensitivity Temperature Dependence

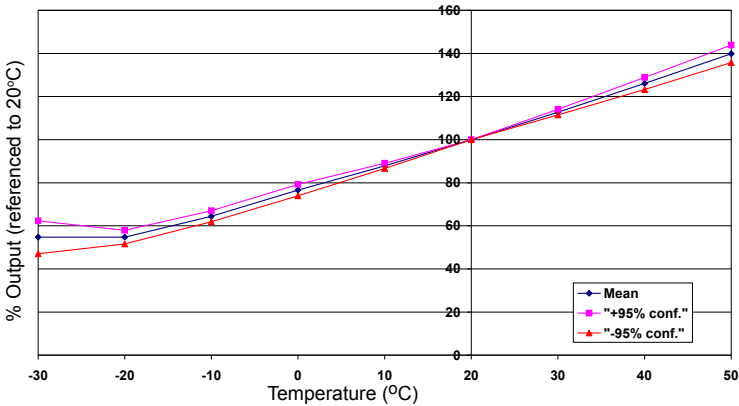

Figure 1 shows the variation in sensitivity caused by changes in temperature.

This data is taken from a typical batch of sensors.

The mean and $\pm 95\%$ confidence intervals are shown.

Figure 2 Zero Temperature Dependence

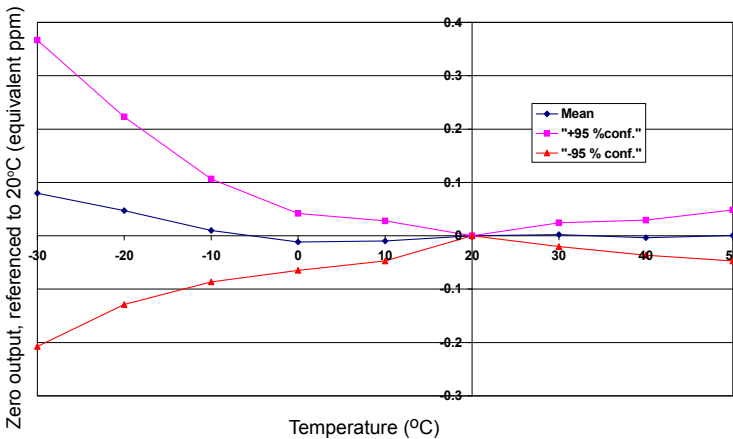

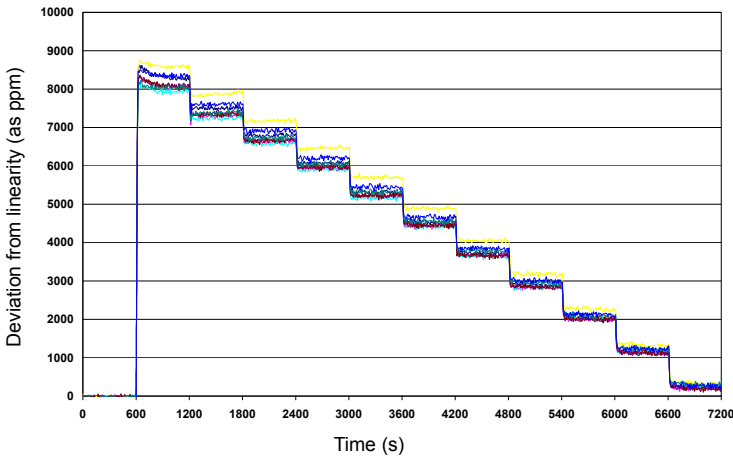

Figure 2 shows the variation in zero output caused by changes in temperature, expressed as ppm gas equivalent, referenced to zero at 20°C.

This data is taken from a typical batch of sensors.

The mean and $\pm 95\%$ confidence intervals are shown.

Figure 3 Response from 10ppm PH3 to Zero

Eight PH3-B1 sensors were tested for response from 10 to 1ppm.

Fast response and stable readings are observed.
