

**MEASUREMENT CAPABILITIES** 

ORDERING INFORMATION

TP5-BL

## TP5-BL

Temperature-controlled pyroelectric detector for laser power measurement from nW to 0.5 mW.

## PRODUCT FAMILY KEY FEATURES

## SPECTRALLY FLAT RESPONSE

These radiometers were developed for NIST, to be used with a broadband spectrometer to act as a spectral transfer standard when calibrating other detectors in the 0.25 to 15  $\mu m$  range.

#### TEMPERATURE CONTROLLED POWER MEASUREMENT

Each head is composed of a low noise detector, thermistor, TE cooler and heatsink to compensate for any temperature change

## THE ULTIMATE CHOICE IN MEASUREMENT STABILITY

Temperature control down to 0.05°C from 20 to 30°C gives a temperature coefficient <0.01 %, thus a voltage output stable to 0.01 %

#### **2 SIZES AVAILABLE**

- $\bullet~$  TP5-BL: 5 mm Ø pyroelectric sensor with organic black coating
- TP9-BL: 9 mm Ø pyroelectric sensor with organic black coating

## TO BE USED WITH THE STEP-CONTROLLER

Plug your TP sensor into the STEP-Controller for power supply and temperature control. You can then use the analog output with a scope or lock-in

## **COMPATIBLE STAND**

STAND-D-233

# **SPECIFICATIONS**

712/100112/11/10011/10011/1001
Maximum average power (continuous)
Noise equivalent power <sup>1</sup>
Spectral range <sup>2</sup>
Typical rise time
Power calibration uncertainty
Chopper frequency <sup>3</sup>
Temperature stability
Voltage response stability
With STEP-Controller and scope. Noise is < 11 nW RMS with STEP-controller and Lock-In. NIST-traceable calibration at 632.8 nm. SDC-500 digital optical chopper sold separately
DAMAGE THRESHOLDS
Maximum average power density
PHYSICAL CHARACTERISTICS
Aperture diameter
Absorber
Dimensions
