

TP9-BL

Temperature-controlled pyroelectric detector for laser power measurement from nW to 0.5 mW.

PRODUCT FAMILY KEY FEATURES

SPECTRALLY FLAT RESPONSE

These radiometers were developed for NIST, to be used with a broadband spectrometer to act as a spectral transfer standard when calibrating other detectors in the 0.25 to 15 μm range.

TEMPERATURE CONTROLLED POWER MEASUREMENT

Each head is composed of a low noise detector, thermistor, TE cooler and heatsink to compensate for any temperature change

THE ULTIMATE CHOICE IN MEASUREMENT STABILITY

Temperature control down to 0.05°C from 20 to 30°C gives a temperature coefficient <0.01 %, thus a voltage output stable to 0.01 %

2 SIZES AVAILABLE

- TP5-BL: 5 mm \varnothing pyroelectric sensor with organic black coating
- TP9-BL: 9 mm \varnothing pyroelectric sensor with organic black coating

TO BE USED WITH THE STEP-CONTROLLER

Plug your TP sensor into the STEP-Controller for power supply and temperature control. You can then use the analog output with a scope or lock-in

COMPATIBLE STAND
